

Resources and Energy Symposium

Beacon Minerals will be presenting at the Resources and Energy Symposium taking place from Monday 23rd May – Wednesday 25th May 2011 in Broken Hill, Australia.

The theme of the Symposium is “Future Proofing Australia – a resources perspective”, the Symposium will be a platform for the industry to discuss strategies that Australia needs to look at in order to stay competitive in future years. There is a strong program, of key note speakers including Ian Smith, Newcrest; Richard Hames, Corporate Philosopher and Professor Ian Plimer, Adelaide University. Along with over 40 resources and energy companies this is a great opportunity to learn more about the resources industry and the global economic outlook as we move ahead into the next century.

We would like to extend an invitation to attend this Symposium as our guest and hear the latest news from us whilst enjoying all that Broken Hill has to offer.

Don't forget that there are more art galleries than pubs in Broken Hill...and there are plenty of pubs!
