

DRILLING PROGRAM AT BARLEE GOLD PROJECT

ASX RELEASE

8-Jun-10

Company Announcements Office
Australian Securities Exchange Limited
4th Floor, 20 Bridge Street
SYDNEY NSW 2000

Dear Sir/Madam

DRILLING PROGRAM AT BARLEE GOLD PROJECT

The company is pleased to announce that the aggressive exploration program at its Barlee Gold Prospect, north of Southern Cross in Western Australia is continuing. Exploration drilling has commenced and geochemical sampling is still ongoing having continued over the last three months.

The current exploration program will include :

- 10,000 metres of RAB/Aircore drilling.
- 3,500 metres of RC drilling and
- 1,000 soil samples.

Primary focus will be :

- RC drilling the regional targets defined at Halleys NE from the previous RAB program.
- RC drilling to further test the Halley West extension and structure.
- RC drilling to test the open extensions of the Phil South East and Crabman South.
- Aircore and RAB infill drilling to develop RC targets at the Kink, Straddle, Lost Bolt South and Fenceline anomalies defined from previous soil sampling.
- To obtain further geochemical samples on outlying regional targets identified from interpreted aeromagnetic data.

The aim of the program is to increase the current JORC inferred resource of 74,000 ounces at 6 g/t Au through RC drilling of identified regional mineralised zones.

Should you have any questions in relation to the above matters, please contact the undersigned on telephone (08) 9476 9200.

For and on behalf of
BEACON MINERALS LIMITED
